

MEYLE AIR SUSPENSION

FULL OE SPECIFICATIONS FOR THE IAM. AIR SUSPENSION MADE EASY

Suspensions are our world - now Air Suspension is too. For independent workshops, premium air suspension repairs were long considered out of reach. Full functionality, OE-quality parts at a competitive price seemed impossible - until now. MEYLE is introducing the first three components of our new Air Suspension range, with more to follow, giving workshops reliable, OE-matching quality parts they can count on.

MEYLE is opening up the air suspension market for independent workshops with the first phase of its new high-quality Air Suspension range.

MEYLE Air Suspension units and struts are manufactured using OE filament winding techniques including cross-ply, straight-ply and multi-ply construction.

MEYLE Air Suspension units and struts are manufactured using OE filament winding techniques including cross-ply, straight-ply and multi-ply construction.

Premium quality components, providing workshops with a cost-effective, reliable alternative to existing solutions.
