Anhang 1 Fotodokumentation  
Annex 1 Photo documentation

Original Equipment	Tested product
 A close-up photograph of the original equipment connector. It features a central circular opening with a textured, slightly irregular inner surface. The connector is mounted on a white plastic base with two vertical rows of small circular holes on either side.	 A close-up photograph of the tested product connector. It has a similar central circular opening but with a smoother, more uniform inner surface. The mounting base is also white plastic but appears slightly different in texture and shape compared to the original.
 A side-view photograph of the original equipment connector. It shows a black plastic housing with a rectangular protrusion on the left side. The central opening is visible from the side, showing its depth and the surrounding structure.	 A side-view photograph of the tested product connector. It shows a similar black plastic housing and protrusion, but the central opening and its surrounding structure appear slightly different in detail from the original.
 A front-view photograph of the original equipment connector. It shows a circular opening with a metallic-looking rim and a textured inner surface.	 A front-view photograph of the tested product connector. It shows a circular opening with a metallic-looking rim and a smoother inner surface compared to the original.
