

Arnott's A-4008 Ram 1500 air spring was designed and developed to improve the durability and performance characteristics of your truck's suspension system.

With its tapered sleeve and progressive spring rate piston, Arnott's A-4008 Ram 1500 air spring keeps your suspension out of the factory bump stops giving you a comfortable and predictable ride even on the most aggressive road surfaces.

The tapered sleeve and progressive spring rate piston on Arnott's A-4008 increases the lifespan of your new air spring by reducing air pressure an average of 33% with no payload and 27% with max payload compared to OEM.
