## Wheel Sensor, tyre pressure control system

The Tesla Bluetooth sensors are installed as standard in Tesla models 3 and Y from November 2020. They are pre-programmed and automatically connect to the vehicle after 20

minutes of travel. The wheel sensors can be used in aluminium and steel rims. The sensors can be ordered individually and are supplied with a valve.

**Material:** Aluminium  
**Weight:** 46 g  
**only in connection with:** Tesla Bluetooth

**Info:** with battery  
 with valves  
 with seal ring  
 with box nut  
 with screw  
 with pressure sensor  
 with integrated air  
 temperature sensor
