

Replacement E1060L01 with E2060L

The OE manufacturer Mercedes-Benz has partially replaced the housing cover on the Actros MP4 (from model year 2011) with a conversion set (A0040949704). After the conversion, the filter E1060L01 can no longer be used. To ensure that the correct filter is always fitted, we replace the E1060L01 completely with the E2060L. The E2060L is backwards compatible and can be installed with the old and new housing cover.

E1060L01 (old)
Mercedes Actros MP4

E2060L (new)
Mercedes Actros MP4, MP5

Stocks of the E1060L01 can of course still be sold with the standard housing cover for the vehicles listed in the catalogue.
