

Replacement E1059L with E2059L

The OE manufacturer Mercedes-Benz has partially replaced the housing cover on the Actros MP4 (from model year 2011) with a conversion set (A0040949604). After the conversion, the filter E1059L can no longer be used. To ensure that the correct filter is always fitted, we replace the E1059L completely with the E2059L. The E2059L is backwards compatible and can be installed with the old and new housing cover.

E1059L (old)
Mercedes Actros MP4

E2059L (new)
Mercedes Actros MP4, MP5

Stocks of the E1059L can of course still be sold with the standard housing cover for the vehicles listed in the catalogue.
