# Tip

**This gets on your customers' nerves! The Mercedes squeaks when starting or braking? Here is the solution:**

## **febi stabilizer bearing with fabric ply**

e.g. febi no. 14942  
e.g. comparison no. 124 323 49 85

febi bilstein is the only supplier in the free parts market who delivers these stabilizer bearings!

The fabric ply prevents the direct contact between the rubber of the stabilizer bearing and the metal of the stabilizer. This ensures that squeaking noises are reliably avoided!

Please consider the potential for your workshop:  
The stabilizer bearings are suited for the series 124/129/201/202/208 and 210. Two pieces must be exchanged per repair and Mercedes.

Ask your febi partner for spare parts by febi bilstein.  
You also find all spare parts at [www.febi.com](http://www.febi.com).
