

SKF Technical Bulletin

Launch of the SKF Pre-mounted wheel bearing solution!

VAG Group and more cars (check latest E-catalogues for detailed information)

New to SKF range: Pre-mounted wheel bearing solution!

Save time by using the SKF Pre-mounted Wheel bearing solution!

SKF has launched the pre-assembled wheel bearing kits with the flange already mounted on the bearing. This provides mechanics a faster repair solution as components are already assembled, allowing below advantages:

- Avoid bearing failures due to mounting issues
- Reduce fitting time and potential issues, as all parts are renewed
- No specific tool is needed!

Save up to 50% of labour time with SKF Pre-mounted wheel bearing solution!

VKBA 6649

OE/SKF standard wheel bearing

VKBA 6649 F

SKF Pre-mounted wheel bearing

SKF will always propose both standard & pre-mounted solution on the Aftermarket!

Save time with SKF Pre-mounted wheel bearing solution!

The pre-mounted wheel bearings with flange enables quick one-piece exchange procedures, ensuring easier and faster replacement and eliminating all mounting issues.

- **NO** need to remove the flange
- **NO** need to remove the inner ring from the flange
- **NO** need to inspect and clean the flange
- **NO** need to press the flange into the new bearing

Just install the SKF complete wheel ready for mounting!

Save time by using the premounted SKF hub.

VKBA 6649 F → Pre-mounted wheel bearing with flange

VKBA 6649 → Loose wheel bearing

Save on average up to 50% of labour time with SKF Pre-mounted wheel bearing kits!
