

Rear axle bearing

Fiat Punto I (ZFA176)

FI126EU

Fiat Punto I model 11.93>9.99 (ZFA176)

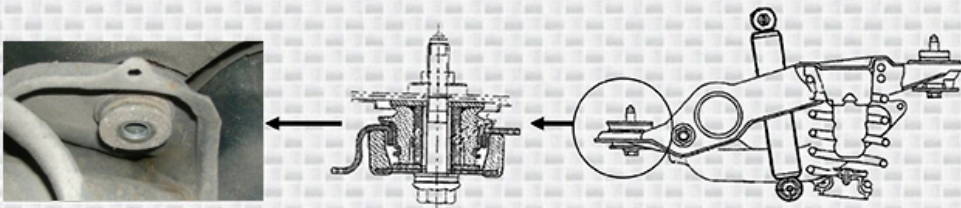

The rubber front of the rear axle bearing supports deteriorates after a mileage causing backlash and you can not be replaced separately from the axle. Monroe® have the "solution".

Mounting :

- 1 - Raise the vehicle
- 2 - Loosen the screws holding the silentbloc

Rear axle bearing
Monroe® Reference **L15806**

- 3 - Tighten the screw by inserting the rear axle Monroe® (reference L15806) torque 10 daN
- 4 - Repeat the operation on the other side

The operation takes 5 minutes: setting forward of the rear axle is securely fastened again more squeaking noise.
