PRODUCT INFORMATION

ELECTRICAL COOLANT PUMP 7.10695.02.0

FOR A NUMBER OF VEHICLES FROM MERCEDES-BENZ

Pierburg has developed a special CWA 100-4 type coolant pump for battery electric vehicles (BEV). Two of these pumps are responsible for thermal management in Mercedes-Benz EQCs as standard. However, this coolant pump is also being retrofitted by Mercedes-Benz as a replacement in a whole range of vehicles with conventional combustion engines.

The pump from Pierburg therefore replaces the pumps from another manufacturer that were originally installed, which increases the vehicle applications massively. The fleet includes several hundred thousand vehicles.

Vehicle manufacturer	Mercedes-Benz
Pierburg no.	Ref. no.*
7.10695.02.0	A 000 500 32 86, A 000 500 39 01, A 000 500 38 00, A 000 500 23 00

NOTE

Motorservice provides this prestige product exclusively in the aftermarket.

All content including pictures and diagrams is subject to change. For assignment and replacement, refer to the current catalogues or systems based on TecAlliance.
